TRANSOFT MODERNIZATION NEWS

July 2009

Welcome to the latest edition of our e-newsletter. If you have any questions or feedback please do not hesitate to contact us.

Transoft extends migration solution portfolio to include Visual Basic (VB)

Transoft has added Visual Basic (VB) migration to its already extensive migration solution portfolio. By migrating valuable VB software assets to VB.NET, C# or even to Java, companies are able to overcome Microsoft's end-of-life policies, and remove the dependence on decreasing VB skills.

Transoft launches My Transoft for customers

You asked and we listened! Transoft would like to announce the launch of My Transoft on our new and improved web site. My Transoft is a secure area for customers of Transoft only. My Transoft provides customers with Frequently Asked Questions (FAQs), support for products, and the latest product news. My Transoft is still in its infancy and its contents will grow continuously. Contact Transoft Support to suggest what additional content you would like to see in the future!

To access My Transoft, go to www.transoft.com/my-transoft and register for access. Once Transoft has validated your credentials, you will receive an email confirming your access to the secure area.

Transoft announces DBPronto

Transoft DBPronto is based on Transoft CIO which was launched 6 months ago and is already being used successfully in a number of organizations. DBPronto extends the functionality to a wider range of legacy data structures. It is designed to work with legacy file handlers including COBOL, C-ISAM, and Transoft U/FOS. DBPronto provides a rapid, easy, and automated means of allowing legacy applications to use a modern RDBMS, creating a

Transoft certifies U/SQL Adapters with Veryant's isCOBOL Technology

Transoft has certified its Transoft U/SQL Adapters for use with Veryant's isCOBOL Application Platform Suite (APS). This qualification enables U/SQL users to deploy the same functionality when they move COBOL programs to isCOBOL APS, and provides enhanced capabilities for current isCOBOL platform users.

DBIntegrate

Transoft DBIntegrate provides real-time, read-write access to multiple disparate data sources.

Just one of our happy customers...

"Transoft has empowered our organization to realize the potential of our products. By salvaging trusted and complex business logic from our legacy systems, Transoft enabled HCC's development staff to focus on new features and technologies instead of an expensive and time consuming re-write."

Larry Stephenson, Vice President - Healthcare Computer Corp.
